AS SPILKA INDUSTRI
PRODUCT INTRODUCTION

The power of quality creating growth for our customers

An uncompromising focus on quality in all aspects of manufacture and product performance is our trademark. The result is products of virtually flawless performance and simplified manufacture for our customers. The end user experience is characterized by ease-of-use and operation, as well as dependable function despite low maintenance requirements. True value – to our customers and their customers.

Spilka Classic

The original – The Spilka Classic system solution is the market leader for fully reversible outward-opening windows. Since our original Spilka Classic hinge was launched, more than 40 million hinges have been sold, a unique recognition of its function, quality and market appeal.

An impressive track record of only 0.0006% factory-registered complaints or 6 'faulty' hinges for every one million sold! Arguably the best testimony to the quality of the Spilka Classic system possible. Our original Spilka Classic hinge was developed in the 1960s, and has since been our primary system solution for production of outward opening top swing windows. The Spilka Classic system quickly became the market leader in its segment, a position it still holds today.

The key benefits of the Spilka Classic system are;

- For use with all profile materials
- Only 7 modules required to reach maximum dimensions
- Fully reversible for safe cleaning
- Sashes always reverse within the overall frame
- Rational manufacture
- Enhanced security in accordance with SBD
- Only 6 complaints for every million sold

Only 6 modules

U-value potential down to 0,8

Spilka Opus

The Spilka Opus system solution for the production of fully reversible outward opening windows is designed to be “discrete”. Mounted between the frame and sash of the window, the hinge is invisible from the outside. No custom routing of the profiles required.

The Spilka Opus hardware system is an outward opening, fully reversible solution designed and manufactured for functionality and performance. Spilka Opus is specifically made to maintain a flush outside surface. This makes it very well suited for production of windows with aluminium cladding. Our robotized manufacturing lines and stringent quality control systems are in place to ensure product longevity and quality as well as minimize service issues.

The key benefits of the Spilka Opus system are;

- For use with all profile materials
- Only 6 modules required to reach maximum dimensions
- Fully reversible for safe cleaning
- Sashes always reverse within the overall frame
- Rational manufacture
- Enhanced security in accordance with SBD
- Integrated “blow-back” restrictor

Spilka Swing

Spilka Swing is a unique hinge solution for the production of side swing outward opening windows. Unlike most other side swing hinges, Spilka Swing allows the sash to reverse 180 degrees.

Spilka Swing offers a complete system solution for production of 180° reversible windows, for efficient cleaning or maintenance. The unique construction of the hinge solution ensures easy and comfortable operation of the window. All hinge components are performance-tested by being opened 20,000 times.

Spilka Top-hung

The Spilka Top-hung hinge is a simple and solid hinge solution often used for cellar, storage room and garage windows.

Our hinge is a practical solution consisting of two components. Sashes with this opening function can be combined in the same window profile with sashes that have other opening functions.

Spilka Side-hung

Spilka Side-hung hinge, a traditional hinge variant they may seem, but Spilka's recently developed solution offers important improvements.

Based on customer feedback we constructed a hinge with small but significant improvements. The result is a solid and competitive solution. High quality materials, good corrosion protection and short delivery times are important criteria. Spilka Side-hung hinges offer an excellent and competitive alternative in the renowned Spilka quality!

Spilka Tango

Spilka Tango sliding door is a production efficient "slide shut" sliding door. A unique solution, patented, hinged wheel assembly for virtually frictionless operation of the door.

It's simple and production efficient construction has made the Spilka Tango sliding door a popular solution. Spilka Tango works according to the same principles as our outward opening windows offering many of the same advantages; function, performance levels and ease of use.

Spilka Aluminium cladding, our concept solution for standard and tailor-made cladding systems for windows and doors. Our improved value chain and internal set-up is specifically designed for facilitating a high degree of flexibility and tailor-making without adversely affecting efficiency, productivity and yield.

Since our founding days in 1933, two of our most important skills as a company have been the ability to design efficient work flows and using technology for highest possible flexibility and productivity. Setting up our aluminium processing centre we included our proprietary robot technology. The result; a highly flexible and efficient production process.

We are therefore proud to offer our partners Aluminium cladding from Spilka made to measure, with customer specified profiles and packaged per instructions – at competitive terms.

Spilka Aluminium glazing beads, bars and accessories, our concept solution for standard and bespoke profiles and accessories. As for the aluminium cladding, the production process is designed to allow for back-to-back integration with our partners through relevant software solutions.

When creating the Spilka Aluminium product concept we took great care in designing the entire value chain. Our focus was on creating win-win situations at every step. The result is a highly flexible and efficient structure of mutually dedicated partners at every stage. Thus we are able to offer any profile at any level of processing, be it as uncut lengths, cut to measure, routed, partially assembled or fully assembled.

Spilka also offers the service of designing special components, be it clips or other parts for easy fitting. And it is only the beginning...

Spilka – your key partner

Complete system solutions, both off-the-shelf and tailored to your needs, is the cornerstone of our product offering. Our ambition is to provide products and services that increase our customers' competitiveness.

Entering into a partnership with Spilka you will get all the hardware needed for production of outward opening windows and doors, as well as the assistance and technical support to do so. One-stop and you're good to go.

Continuous development

Launched in the 1960's, the industry-changing Spilka Classic, continued and strengthened our longstanding tradition of innovation and evolution.

To date this remains one of our most important activities. We are dedicated to creating new solutions and new product concepts that add value for our customers, be it making bespoke parts of systems, new designs or products for new areas.

Technical support

At Spilka we take great pride in the fact that not only do we sell top quality products and system solutions, but we also provide a full suite of services to help our partners bring their products to market. Our services include construction of the window solution, tailor making of parts and components, product testing as well as product development – all with the ambition of helping our partners succeed in the market place.

Customer loyalty

Deeply rooted in our culture is the ever ongoing search for excellence in all aspects of our activities. As a result we are privileged to enjoy strong and lasting relationships with our partners. The key ingredient behind achieving this is mutual trust, respect and openness. Most importantly we remain focused on delivering value adding products and services that are relevant to our customers.
